## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 8, "title" has been changed to tilt.

In claim 4, line 8, "title" has been changed to tilt.

The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination, fails to anticipate or render obvious, the method, including the limitations of forming a dielectric layer on the first sidewall, the second sidewall and the bottom of the trench in a substrate layer, performing a tilt angle ion implantation process to dope ions into the first dielectric layer on the first sidewall and on the bottom, but not dope ions into the first dielectric layer on the second sidewall, selectively etching away the doped first dielectric layer on the first sidewall and on the bottom in combination with the other limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
